Definitions of a Serious Health Condition
Inpatient Care
• An overnight stay in a hospital, hospice, or residential medical care facility. • Inpatient care includes any period of incapacity or any subsequent treatment in connection with the overnight stay.
Continuing Treatment by a Health Care Provider (any one or more of the following)
<u>Incapacity Plus Treatment:</u> A period of incapacity of more than three consecutive, full calendar days, and any subsequent treatment or period of incapacity relating to the same condition, that also involves either: • Two or more in-person or telemedicine visits to a health care provider for treatment within 30 days of the first day of incapacity unless extenuating circumstances exist. The first visit must be within seven days of the first day of incapacity; or, • At least one in-person or telemedicine visit to a health care provider for treatment within seven days of the first day of incapacity, which results in a regimen of continuing treatment under the supervision of the health care provider. For example, the health provider might prescribe a course of prescription medication or therapy requiring special equipment.
<u>Pregnancy:</u> Any period of incapacity due to pregnancy or for prenatal care.
<u>Chronic Conditions:</u> Any period of incapacity due to or treatment for a chronic serious health condition, such as diabetes, asthma, migraine headaches. A chronic serious health condition is one which requires visits to a health care provider (or nurse supervised by the provider) at least twice a year and recurs over an extended period of time. A chronic condition may cause episodic rather than a continuing period of incapacity.
<u>Permanent or Long-term Conditions:</u> A period of incapacity which is permanent or long-term due to a condition for which treatment may not be effective, but which requires the continuing supervision of a health care provider, such as Alzheimer's disease or the terminal stages of cancer.
<u>Conditions Requiring Multiple Treatments:</u> Restorative surgery after an accident or other injury; or a condition that would likely result in a period of incapacity of more than three consecutive, full calendar days if the patient did not receive the treatment.
